EXPERIENCE

Lithios Apps   *(Feb 2022-Present)*
Product Designer (Contractor)

- Currently designing end-to-end experiences for a mix of client sizes at the Lithios design agency.

Palantir Technologies   *(June - Aug 2022)*
Product Design Intern

- Designed a new end-to-end workflow that enabled 'live-entity proximity alerting'.
- Redesigned the 'live-entity observation log' in a way that now enabled Palantir to give users insights based on the logged observations data we were collecting. The new observation log was also better adapted for a large scale of data.
- Presented to multiple stakeholders including the design "Group Lead" (Director of design).

Intuit   *(Sept - Dec 2021)*
Product Design Intern

- Helped introduce upsells to the Canadian Turbotax product. This addition was set to increase average revenue per user (ARPU) by 10$+ for the business.
- Conducted user tests and prepared UX research reports that impacted in-product and marketing website design decisions.
- Designed and shipped key pages for TurboTax Canada's 2021 remodel.
- Built responsive components in Figma allowing the XD team to design at 1.5X the previous speeds.

University of Toronto   *(Feb - June 2021)*
UX/UI Bootcamp Assistant Instructor

- Facilitated growth of 30+ driven students in design, with a 90% certificate obtention rate.
- Aided students in the comprehension of : user-centric design, research, prototyping, wireframing, storyboarding, HTML5, CSS, interaction design, JavaScript basics etc.

SUMMARY

I'm a new grad Product designer who's, while in school, managed to provide value to various products and teams. I'm now looking for a full-time position where my designs will be able to have an impact, and where I'll be able to learn from design industry leaders!

Sounds like a match? Let's talk!
