French - Fluent

EXPERIENCE:

University of Toronto — *UX/UI Bootcamp Assistant Instructor*   Feb 2021 - Present

- Working with the instructional staff to teach: user-centric design, research, design thinking, prototyping, wireframing, interface design, storyboarding, prototyping, HTML5 and CSS, interaction design, JavaScript basics and jQuery basics.

Here2Help — *User Experience Designer*   Dec 2020 - Present

- Created a mobile app that will help communities interact and help each-other once COVID-19 restrictions ease.
- Worked with the user experience team to draw conclusions from conducted user research.
- Identified user pain points, and needs to inform design decisions.
- Created the mobile app' design system.

Unytag — *Product Design Intern*   Jan 2021 - Feb 2021

- Designed and prototyped both the mobile and the desktop versions of Unytag' website.
- Conducted a heuristics assessment of the Unytag marketing website and improved the overall brand presence, with design suggestions.

Entice — *User Experience Design Intern*   Nov 2020 - Jan 2021

- Understood and synthesized Entice users' response to the current web platform, discovered pain points and proposed solutions to improve their experiences in a way that does not majorly change the current UI.
- Designed and prototyped two new platform features the "Custom Entice" and the "Invite System".
